

WHY DEXCOM CGM?

For people with type 1 or type 2 diabetes, CGM reveals what no meter can. Unlike fingersticks that show you a number for a single point in time, the Dexcom G6 lets you see your child's glucose data so you always know when their glucose levels are trending high, low or when they're good to go.

Zero Fingersticks

Factory calibrated to allow for zero fingersticks*

Slim, Water Resistant Wearable†

A slim water resistant sensor is discreet and easy to wear for up to 10 days

Smart Device Compatibility

See glucose data on your compatible smart devices in real time‡

Customizable Alerts & Alarms

Set your range and get notified when you're heading high or low

Indicated for Ages 2+ Years

The only CGM FDA-permitted for children ages 2 years and up

Follow app

Share your glucose data with up to 10 followers§

*Fingersticks required for diabetes treatment decisions if symptoms or expectations do not match readings. †The Dexcom G6 Sensor and Transmitter are water resistant and may be submerged under eight feet of water for up to 24 hours without failure when properly installed. ‡For a list of compatible devices, visit www.dexcom.com/compatibility §Do not make treatment decisions based upon Share and Follow readings. Always confirm with your compatible smart device or receiver.

"YOU HAVE GIVEN MY HUSBAND AND ME OUR LIVES BACK. WE'VE RETURNED TO WORK, ENROLLED THEM IN DAYCARE, AND NOW CAN SLEEP THROUGH THE NIGHT!"

-Rebeka J.

"DEXCOM SHARE IS LIFE-CHANGING AS SHE GOES OFF TO SCHOOL!"

-Beth R.

"MY DEXCOM KEEPS ME IN THE GAME!"

-Nathan P.

BRIEF SAFETY STATEMENT

Failure to use the Dexcom G6 Continuous Glucose Monitoring System (G6) and its components according to the instructions for use provided with your device and available at <https://www.dexcom.com/safety-information> and to properly consider all indications, contraindications, warnings, precautions, and cautions in those instructions for use may result in you missing a severe hypoglycemia (low blood glucose) or hyperglycemia (high blood glucose) occurrence and/or making a treatment decision that may result in injury. If your glucose alerts and readings from the Dexcom G6 do not match symptoms or expectations or you're taking over the recommended maximum dosage amount of 1000mg of acetaminophen every 6 hours, use a blood glucose meter to make diabetes treatment decisions. Seek medical advice and attention when appropriate, including for any medical emergency.

dexcomG6

HOW DOES THE DEXCOM G6 WORK?

With glucose readings every five minutes, the Dexcom G6 CGM System lets you know where your child's glucose levels are and which direction they are heading, continuously and conveniently from your compatible smart device.*†

Applicator

- Simple, auto-applicator to insert the sensor just beneath the skin

Sensor

- Measures glucose levels for up to ten days
- Acetaminophen blocking—accurate glucose readings even when taking acetaminophen‡

Transmitter

- Affixed to the top of sensor
- Sends data wirelessly to a display device

Display Device Dexcom Receiver or compatible smart device*§

- Displays a glucose reading every 5 minutes—up to 288 a day
- Trend arrows and vivid colors to show the speed and direction your glucose is heading

THE POWER OF SHARING

dexcomG6

Whether they're at dance practice or pitching in the championship game, you can monitor your child's glucose levels directly from your compatible smart device.*

With the built-in Dexcom Share feature, you can allow up to ten of those nearest and dearest to follow your child's glucose levels.*||

NO SMART DEVICE? NO PROBLEM.

For more flexibility, the Dexcom touchscreen receiver comes with your child's CGM system.
